

Predicting the Weather

forecast- to predict; a prediction. A weather forecast makes the best guess at what the weather will be in the near future.

meteorologist- a scientist who studies Earth's atmosphere and weather.

weather map- a model or representation of one or more weather variables.

Fronts:

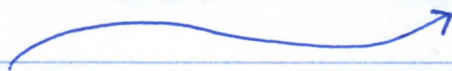

Pressure:

High = H (not Hot!)

Low = L

Jet Stream:

Notes:

- Weather moves from areas of high pressure to areas of low pressure
- In the United States, the jet stream blows from west to east. This pushes the weather along with it.
- Meteorologists use satellites, weather balloons, and Doppler radar to predict weather.
